

# Greenwashing! How to spot climate lies.

## Walking Debate

I understand the term greenwashing and I will be able to spot it in the future.

Companies should have to pay a penalty if they are caught out for greenwashing.

If I was a business owner I would greenwash too. It's hard to keep a business going.

When given the chance to pay extra for carbon offsetting, for example when taking a flight, we should do it. It gives us the idea that it's okay to take a flight.

Schools should devote more time to teach their students how to spot greenwashing.
